World Heart Federation: Launch of the CVD Secondary Prevention Roadmap

Langue Anglais

The World Heart Federation (WHF [1]) has launched a Roadmap focused on providing healthcare professionals and policymakers across the world with tools and solutions to manage the secondary prevention of cardiovascular disease (CVD) and reduce premature death globally.

The roadmap will help drive the WHO target of reducing heart attack and stroke by 2025 by providing practical tools to improve healthcare and prevent CVD in low, middle and high-income countries.
